DC ENERGY **BENCHMARKING**

A key benchmark or standard for commercial buildings addresses how “clean” it is.

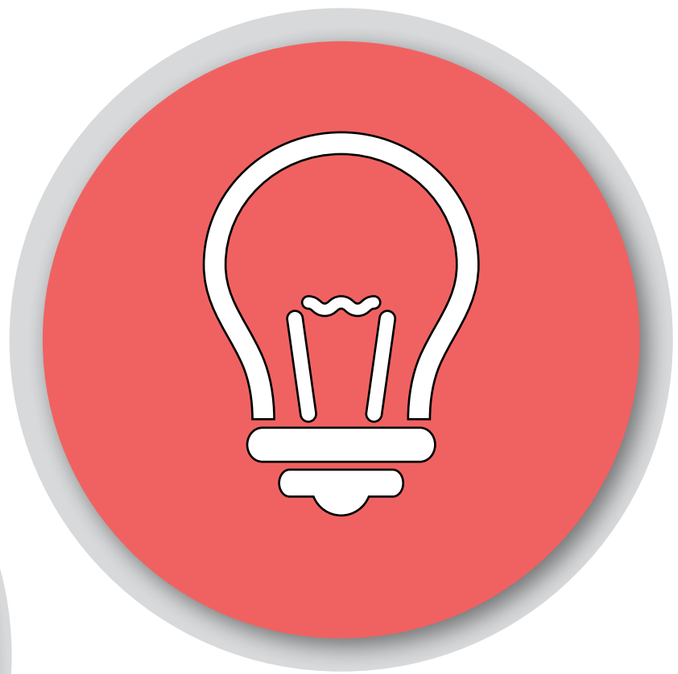
A clean building is one with a minimal carbon footprint, including low greenhouse gas emissions.

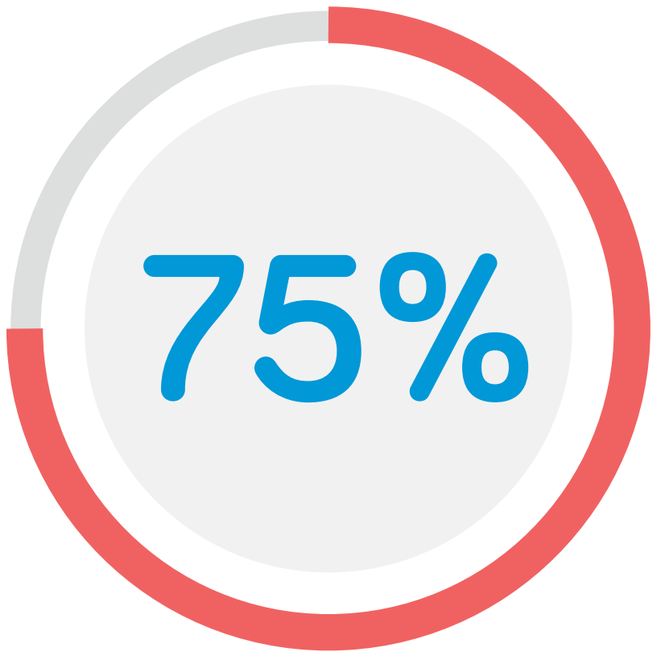
Maximum standards are set by the District of Columbia of said gases.

Those limits are lowered over time, requiring buildings to adhere to ever more stringent benchmarks.

IMPROVE YOUR BEPS RATING

Use water,
power and gas
more efficiently
and cleanly.





Nearly 75% of DC's greenhouse gases are generated by commercial energy use.

Buildings not meeting current benchmark may be required to improve energy performance by 20% over a 5-year compliance period.

WHO CAN I TALK TO ABOUT THIS?

INNOVATIVE MECHANICAL SYSTEMS

Innovative Mechanical Systems specializes in energy efficiency upgrades and system retrofits.

For over 20 years, our team has been providing the Washington, DC, tri-state area with the highest level of HVAC and plumbing expertise.

CALL NOW! (301) 752-5872

WE CAN HELP YOU LOWER YOUR BUILDINGS CARBON FOOTPRINT TODAY!
